For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(57) Abstract: A composition for use as a prosthetic biomaterial and associated method. The biomaterial exhibits cytocompatibility, mechanical functionality and osteoblast adhesion between the implant and interfacing surface. The biomaterial is metallic, has a grain size less than about 500 nanometers and has a surface roughness of less than about 800 nm rms.

A. CLASSIFICATION OF SUBJECT MATTER IPC(7) : A61F 2/28 US CL : 623/16.11	
According to International Patent Classification (IPC) or to both r	national classification and IDC
B. FIELDS SEARCHED	national classification and IPC
Minimum documentation searched (classification system followed	The design of the second
U.S.: 623/16.11	by classification symbols)
Documentation searched other than minimum documentation to the	ne extent that such documents are included in the fields searched
Clastronia data hara accomited during the	
Electronic data base consulted during the international search (nan	me of data base and, where practicable, search terms used)
C. DOCUMENTS CONSIDERED TO BE RELEVANT	
Category Citation of document, with indication, where	appropriate, of the relevant passages Relevant to claim No.
A US 6183255 A (OSHIDA et al) 06 February 2001	, see entire document.
Further documents are listed in the continuation of Box C.	See patent family annex.
Special categories of cited documents:	"T" later document published after the international filing date or priority
A* document defining the general state of the art which is not considered to be of particular relevance	date and not in conflict with the application but cited to understand the principle or theory underlying the invention
earlier application or patent published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step
document which may throw doubts on priority claim(s) or which is cited to	when the document is taken alone
establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be
	considered to involve an inventive step when the document is combined with one or more other such documents, such combination
document referring to an oral disclosure, use, exhibition or other means	being obvious to a person skilled in the art
 document published prior to the international filing date but later than the priority date claimed 	"&" document member of the same patent family
ate of the actual completion of the international search	Date of mailing of the international search report
